Federal Civilian Sector

2023 Strategic Plan

Overview

ManTech is a national security company that provides mission support to customers in three core sectors — Defense, Intelligence and Federal Civilian. Whether ensuring DoD mission readiness, mitigating threats to national interests or monitoring the quality of health care, finding the right team to deploy the best and most secured capabilities — at speed — is critical to customer success.

ManTech’s understanding of customers’ needs is the driving force behind our technology development and investments. We proactively approach our customers and markets to identify customer needs, develop solutions in advance of formal customer requests and engage as a trusted partner to deliver superior solutions. For more than half a century, ManTech has been where our customers are — land, sea, air, space, cyberspace and everywhere in between, delivering full-spectrum solutions to protect, defend and support the nation wherever needed. Our key Technology Focus Areas align to our customers’ mission-critical needs.

Where Innovation Meets Mission

Federal Civilian agencies are in the midst of digital transformation and IT modernization. They are implementing multi-cloud or hybrid cloud solutions to modernize systems, optimize performance and lower operational costs. ManTech partners with agencies whose missions range from supporting diplomatic missions to monitoring financial markets, safeguarding America’s borders and providing medical logistics and analytics that support quality health care.

With threats to the U.S. critical infrastructure and the need for on-demand digital citizen services on the rise, Federal Civilian agencies require partners with a deep understanding of and an ability to protect and use their data to fulfill the mission. ManTech offers secure and compliant solutions for migrating applications to the cloud, proactively monitoring and managing IT operations, performing complex analytics, and securing IT infrastructure and enterprise applications.

Five Technology Focus Areas

	Cognitive cyber for physical and digital platforms	CyberNext
	Mission & Enterprise Information Technology	M/EIT
	Analytics, Automation, and Artificial Intelligence	A ³
	Intelligent Systems Engineering	ISE
	Data at the Tactical Edge	D@tE

Key Solutions and Services

- **Full Spectrum Cybersecurity**
 - Continuous Monitoring/Information Assurance
 - SOC & Incident Response
 - Penetration testing and security assessments
- **Analytics/Data Science**
- **Machine Learning**
- **Artificial Intelligence**
- **DevSecOps**
- **Application Development**
 - SAFe / Agile
 - User Experience
 - Testing
- **Enterprise IT**
 - Cloud Migration
 - Hybrid Cloud/Multi-Cloud
 - IT Operations
 - Help Desk Support
 - Training
 - Operations and Maintenance
 - Enterprise Managed Services
- **Emerging Technology Insertion**
- **Global Logistics and Supply Chain Management**
- **Systems Engineering and Technical Assistance (SETA)**
- **Threat Intelligence and Analysis**

Who We Are

More than half a century ago, ManTech began with a single government contract to develop war-gaming models. Today we play a critical role in more than 600 government contracts and task orders to support our customers' Defense, Intelligence and Federal Civilian needs. Our talented and passionate people partner with our customers to solve complex challenges and address critical priorities.

What We Do

ManTech's exceptional people, processes and innovation solve our customers' most difficult challenges in a period of global and national digital transformation. We invest and develop differentiated solutions in five Technology Focus Areas to meet our customers' mission needs. These investments focus on the development of innovative tools and approaches that are repeatable and tailorable to specific customer solutions.

How We Serve

We are an inclusive, diverse and talented workforce with a passion for mission success, intellectual capital, creativity and integrity. Our high ethical standards and investment in our people build confidence with our customers.
